»	6	»	Nr	29–34	»	»	20 juni	1960

SJUTTONDE BANDETS INNEHÅLL

		Sid.
1.	Djurle, E., Precision phase contrast refractometry and its application to heavy-light water	1– 59
2.	Bergvall, P. and Hagström, S., Atomic level energies in rare earth elements	61– 79
3.	Flodmark, S., Note on a Besk programme for molecular one-electron two-center integrals and some diagrams showing the dependence of these integrals on the orbital exponents	81– 88
4.	Wallin, L., Large deflections of non-linear elastic rectangular plates	89– 95
5.	Grabe, B., Calculation of energy levels and electron distribution in reduced and oxidized forms of diphosphopyridine nucleotide and of flavine	97–111
6.	Bergvall, P., Hörnfeldt, O. and Nordling, C., Crystal diffraction and photo electron measurements of K and L levels in the elements 47 Ag to 52 Te	113–123
7.	Bergvall, P., Precision measurements of gamma energies and intensities by crystal diffraction	125–147
8.	Wilhelmsson, H. and Kerman, A., On the integration of a certain matrix element $\langle 0\|f^{(2)}(x)\|q,k\rangle$ in the perturbation approach of quantum electrodynamics	149–156
9.	Ohlin, P. and Händel, S., Experiments with a low inductance high vacuum X-ray flash tube set	157–161
10.	Johansson, B. and Alväger, T., The high-frequency deflection method for measuring short half-lives. Part 1. Principle and some measurements	163–176
11.	Lehnert, B., Confinement and energy balance in a rotating plasma	177–178
12.	Toresson, Y. G., Spectrum and term system of trebly ionized silicon, Si IV	179–192
13.	Uhlhorn, U., On statistical mechanics of non-equilibrium phenomena	193–232
14.	Uhlhorn, U., Macroscopic observables and generalized canonical ensembles	233–255
15.	Uhlhorn, U., On the foundations of the linear theory of irreversible processes. I	257–272
16.	Uhlhorn, U., On the foundations of the linear theory of irreversible processes. II	273–314
17.	Herrlander, C. J., Stockendal, R. and Gupta, R. K., The decay of Tl^{201}	315–335
18.	Gupta, R. K., On the determination of the electron-capture decay energies of Tl^{201} and Tl^{202}	337–342
19.	Uhlhorn, U., Statistical mechanical approach to non equilibrium thermodynamics	343–360
20.	Uhlhorn, U., Onsager's reciprocal relations for non linear systems	361–368
21.	Larsson, K.-E., Dahlborg, U. and Holmryd, S., A study of some temperature effects on the phonons in aluminium by use of cold neutrons	369–392
22.	Bäckström, G. and Marklund, I., The decay of As^{76} to Se^{76}	393–409

23. Grabowski, Z., Gustafsson, S. and Marklund, I., Angular correlation measurements on levels in Se^{76} and Fe^{56} 411–419
24. Bashandy, E., Gerholm, T. R. and Lindskog, J., A delayed coincidence measurement of the 2.9×10^{-10} sec. half-life of the 279 keV first excited state in Thallium 203 421–426
25. Waldeskog, B. and Mathiesen, O., Photometric charge determination of relativistic heavy primaries in cosmic radiation 427–440
26. Mathiesen, O., Determination of the charge of relativistic heavy primaries in cosmic radiation by δ-ray counting and a comparison with photometric identification 441–454
27. Kristiansson, K., Mathiesen, O. and Waldeskog, B., The abundance of nuclei heavier than oxygen in the primary cosmic radiation 455–483
28. Kristiansson, K., Mathiesen, O. and Waldeskog, B., Identification of non-relativistic heavy primaries in cosmic radiation by photometric measurements in nuclear emulsions 485–493
29. Alväger, T., The high-frequency deflection method for measuring short half-lives. Part II. The electron coincidence spectrometer and related arrangements used in connection with the high frequency deflection, time measuring instrument 495–515
30. Klein, O., On the treatment of the gravitational field in connection with the generally relativistic Dirac equation 517–520
31. Alväger, T., The empirical matrix element of the M4 transition in Xe^{135} 521–534
32. Alväger, T. and Ryde, H., On the possibility of the detection of double quantum emission in atomic nuclei, with special application to the decay of Xe^{131m} 535–551
33. Stockendal, R., Isomeric transitions in Pb^{205} 553–578
34. Stockendal, R., Internal and external conversion studies on the decay of Bi^{203} and Bi^{204} 579–596
